Crisis Management Plan for Dalton, Walton, and Carlton, Inc.

Introduction

Purpose: To provide a structured response framework to mitigate the impact on Dalton, Walton, and Carlton, Inc. The Crisis Management Plan aims to ensure the safety of our employees, maintain business continuity, and protect the company assets.

Scope: Applies to contractors, employees, and visitors Dalton, Walton, and Carlton, Inc.

- Covers various types of crises such as technological incidents, health emergencies, natural disasters, and human-related events.

Definition of Crisis

What is a crisis? A crisis is an event of any kind that poses a significant threat to the safety, health, and well-being of employees (2023). Here are the kinds of crises as well as examples included:

- **Natural Disaster:** Always pose a potential disruption to businesses (2023). Examples of natural disasters are hurricanes, earthquakes, floods, and tornadoes. They not only can impact the physical location of a business but disrupt services outside of it.
- **Technological Crises:** Examples of technical failures are power outages, equipment failures, and cyber-attacks. E-commerce companies suffer the most when their servers go down since a significant portion of their business relies on technology.
- **Human-related events:** Examples of events caused by humans are workplace violence, cyber-attacks, terrorism, sabotage, etc. This kind of crises happens suddenly without warning, so companies need a plan in place to react quickly.

- **Health Emergencies:** Emergencies such as pandemic, chemical spills, illness, injury, or any condition that can impact a business to change their sites. COVID-19 escalated quickly and affected businesses in every area, causing companies to pivot to remote work and/or create new protocols to keep the essential customers and employees safe (2023).

Activation Protocol

Activation Triggers

A crises management plan is triggered or activated when the events meets a specific criteria relating to the impact or threat. These triggers are:

- Warning of weather or natural disasters
- Security breaches
- Incident of violence
- Public health emergencies
- Threats to life
- Equipment Failure/System/IT Power Outage

Levels of Urgency:

1. Level 1 (Minor): an incident involved a limited area (2024). May cause limited impact or interruption to a college campus, for example. Other examples of incidents are chemical spills or fires within a small area.
2. Level 2 (Moderate): significant emergency to disrupt an entire floor or building. It may escalate quickly and have severe consequences for critical functions and safety (2024). It will result in automatic activation of the Emergency Operations Center (EOC). An example is a small fire on site.

3. Level 3 (Major): A significant impact requiring the management team's full attention. An example of a Level 3 Incident is an active shooter or a large-scale natural disaster.

Escalation Process

1. Initial assessment by personnel
2. Immediate notification to the leader
3. Relevant crises response protocols activated.
4. Higher levels of urgency are escalated if the situation is worse overtime
5. Until resolution, reassessment and continuous monitoring are necessary.

End of Crisis:

An announcement from the crisis management leader communicates the message to all internal channels to signal the end of the crises. Then, start the recovery process of operations.

Scenario Examples

Natural Disaster: Earthquake

Before Crisis

- Ensure all employees are trained on earthquake safety procedures such as the “Drop, Cover, and Hold” drill.
- Inspect building for structure weaknesses or tears. Secure heavy equipment such as furniture to prevent potential damage.
- Establish a backup command center outside of the earthquake or natural disaster zone.

During Crisis

- Use the crisis management plan as soon as the earthquake happens.
- Ensure all employees follow the drills.
- Move operations to the backup center if primary location is affected.
- Use the emergency communications platform to send message to all employees and provide instructions for them to follow.
- Notify emergency services

After Crisis

- Conduct a headcount of all employees to make sure they are safe and present. Inspect and assess the building for damage before reentering.
- Recovery process: repairs, insurance claims, and support employees with counseling when necessary.

Workplace Violence

Immediate Response

- Safety is first. Secure the building with lockdown. Employees need to be trained with how to evacuate safely or to hide in a secure spot.
- Contact law enforcement immediately. Someone should be coordinated with emergency responders.
- Use the communication system to inform employees of the situation.

After the incident

- Offer counseling services for employees who were affected by the event. Provide mental health resources.
- Conduct a thorough review of the safety protocols.
- Update lessons learned.
- Communicate with employees by holding a company-wide meeting to discuss the incident, address concerns, and outline steps needed to be taken to improve the safety of the workplace environment for all.

Pandemic

Compliance with regulations

- Stay informed of health guidelines and ensure that company's policies comply with these rules.
- Implement measures such as social-distancing, masks, and vaccination policy.

Ethical Communication

- Communication transparently to all employees about the company's actions. Include measures taken to protect their safety and health.
- Ensure that communication about the pandemic is based on facts and does not spread misinformation.
- Work closely with legal advisors to ensure that actions comply with employee rights and labor laws.

Data Breach

Identification

- IT team detects unauthorized access to sensitive information
- Containment measures are activated to prevent attackers from further access.

Notification: who to notify

- Internal Communication: Crisis Management Team
- External Communication: Affected customers and regulatory bodies.
 - by law within 72 hours or three days (required)

Response

- disconnect affected system from network to prevent further damage or loss of data.
- Launch an investigation to determine the breach, how it happened, and what kind of data or information was compromised
- Implement security measures to prevent further breaches. Patch vulnerabilities and update security protocols

Recovery

- Work with IT to restore compromised data. This is done with security backups
- Provide customer support to those who need to protect their information
- Review the incident with the crises management team to reflect the lessons that were learned. Update the management plan in accordance to such changes.

Chain of Command

Crisis Management Organization Chart:

1. Crisis Management Team Leader
 - a. Authority and decision-maker
 - b. Coordinates with external agencies and the team
2. Operations Coordinator
 - a. Manages on-ground responses.
3. Communications Coordinator
 - a. Handles communication (external and internal)
4. Safety Officer
 - a. To ensure safety protocols are followed within all members.
5. Logistics Coordinator
 - a. Manage supplies and resources.
6. Site-specific Response Teams
 - a. Respond to incident at specific locations.
 - b. Led by managers at different sites.

Command Center Plan

Primary Command Center:

- Location: Main Headquarters
- Equipment: power backup, supplies, and communication devices.

Backup Command Center:

- Location: Secondary Office
- Similar setup to primary command center

Required Materials:

- Communication Devices (phones, internet, tablets, radio)
- Backup generators
- Fuel
- Emergency kits
- Access to key documents (contact lists, facility maps, employee information, etc)

Supply Checklist Example

Checklist of items that should be filled out, then becomes available in the command center.

Item	Quantity	Location	Responsible Person
First Aid Kit			
Radios			
Batteries			
Facility Maps			
.....			

Response Action Plan

Natural Disasters:

- Evacuation immediately
- Shelters in place
- Damage assessment
- Initiate repair

Technological Incidents

- IT team takes action to restore the system.
- Backup data, part of the recovery process
- Activation of cybersecurity protocols

Human-Caused

- Security lockdown
- Law enforcement is notified of the incident.
- Investigation measures

Health Emergencies:

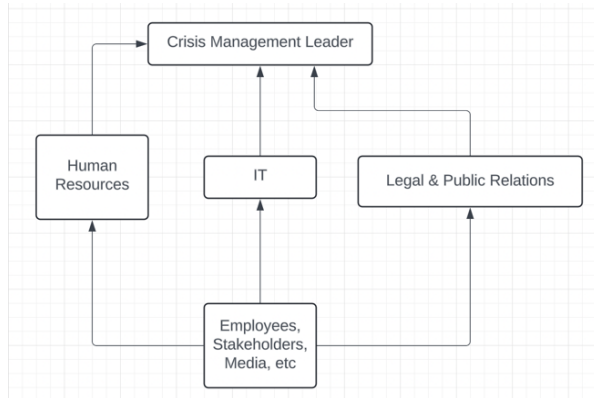

- Medical Response Team
- Procedures for decontamination and quarantine
- Communicate with public health authorities about health emergencies!

Timeline of Action

A timeline can be used or referenced to outline the appropriate actions in different phases or time passed. Here is the timeline as follows:

- 0-15 minutes: Identify the crisis, assemble team, and respond
- 15-60 minutes: Assess the situation, communicate with your stakeholders, and use the emergency protocols.
- 1-3 hours: Response actions, monitor the event, and update situation.
- 3-4 hours: Begin recovery phase and continue monitoring.

Communication Flow

Internal Communication Plan

System + Backup Methods

- Primary: Company-wide notification system such as texts or automated calls
- Backup Methods: messaging apps, email alerts

Contact Information Collection

- Crises Management Team
- Key Personnel
- External consultants
- Subject matter experts

Urgent Information

- Update to all communication channels about status
- Give clear instructions for employees' safety.
- Always update status to affected stakeholders such as a threat or a loss of life

Sensitive Sharing

- Schedule meetings with the involved or key stakeholders
- Secure the channels with sensitive information.

External Communication Plan

Spokesperson: Public Relations Officer

Notification

- Affected areas to have media outlets.
- Notify key stakeholders such as suppliers, clients, and regulatory bodies.

Holding Statements

- Pre-drafted statements with details of the crises.

Communication Resources

- Provide a website for crises.
- Hotline for inquiries for physical and mental health of employees.
- Telephone: 253-XXX-XXXX
- Website: www.darltonwaltoncarlton.com

Strategies For Communication

- Transparent messaging on all platforms to inform all stakeholders.
- Protect the company's reputation.
- Notifications on always
- Open line of communication methods on platforms
- Higher number of communication lines for effective communication in case of one delayed method.

Resources

Required Materials:

- Emergency kits (including medical supplies, hardhats, flashlight, food, water, etc.)
- Financial items as a resource. (example: credit card for emergencies).
- A standby such as a public relations officer

Information Resources:

- Flowcharts
- Facility Maps
- Supplier Contracts
- Benefits information of employees
- Union Contract
- Mental Health Support Team

Training

Crisis Management Team Training:

- Drills and exercises
- Scenarios to help identify and address potential flaws in the plan.

Staff Training

- Having procedures for role-specific emergencies.
- Using communication protocols and necessary emergency equipment

Review

Structured Review Process:

- Regular planned schedule of updates and evaluations
- Identify lessons learned in the time of reflection.
- Implement needed and necessary changes based on immediate events.

Appendices

Appendix A: Contact List

- External consultants
- Emergency services
- Crisis Management Team
- Team Leaders/Officers
- Employee Contact Information
- Open communication lines
- Mental Health Services

Appendix B: Facility Maps

- Evacuation routes for maps
- Floor plan
- Emergency Evacuation

Appendix C: Emergency Kits Inventory

- Content and location of emergency kits
- List of inventory

Appendix D: Holding Statements

- Templates provided for a variety of scenarios with crisis.

Appendix E: Training Documentation

- Keep records of training sessions

Conclusion

This document of the crisis management plan for Dalton, Walton, and Carlton, Inc. ensures that the company is prepared to respond to any emergency by protection their employees and reputation. In addition, regular training, updates, and reviews will make the plan effective and in place. While changes will always be made, a comprehensive plan with strategies and examples will lead to the well-being of employees.
